

KRONOS 1700M PREDATOR CHAIN MULCHER

PREDATOR

1700 M

**WHY SETTLE FOR REPLACING KNIVES AND ADDED MAINTENANCE,
WHEN YOU CAN HAVE THE ULTIMATE SOLUTION?**

THE KRONOS 1700M CHAIN MULCHER PROVIDES EXCELLENT RESULTS IN DEMANDING CONDITIONS.

KRONOS

INTRODUCING THE 4TH GENERATION OF CHAIN MULCHERS KRONOS 1700M

THE KRONOS 1700M IS THE MOST ROBUST CHAIN MULCHER ON THE MARKET. IN TERMS OF WEIGHT AND WHEN COMPARED TO COMPETING MACHINES, YOU CAN CLEARLY UNDERSTAND WHY. THE MULCHING HEAD FEATURES A DOUBLE LAYER STRUCTURE, MANUFACTURED FROM HARDOX. THE HEAD IS A PYRAMID DESIGN, ALLOWING FOR DIRT AND DEBRIS TO SIMPLY SLIDE OFF. ADDITIONALLY, AS WITH ALL KRONOS PRODUCTS, ALL COMPONENTS ARE SHOT-BLASTED PRIOR TO BEING POWDER-COATED, IN OUR OWN FACTORY, LOCATED IN KRONOBY (KRUUNUPYY), FINLAND. WHERE KRONOS HAS BEEN PRODUCING QUALITY MACHINES FOR OVER 100 YEARS.

PREDATOR 1700 M

THE MOST ROBUST CHAIN MULCHER ON THE MARKET

ONLY SHAFTS OF THE HIGHEST QUALITY (TYPE 8 & 9) GEARBOXES FROM BONDIOLOI ARE USED.

SHAFTS INSTEAD OF BELTS. TRANSLATES IN TO LOWER MAINTENANCE COSTS, AND REDUCED POWER LOSS FROM TRACTOR TO THE MULCHER.

THE FRONT HOOD CAN BE OPENED MANUALLY, OR OPTIONAL BY HYDRAULIC, TO ALLOW FOR LARGER VOLUMES OF MATERIAL OR SMALL TREES TO ENTER.

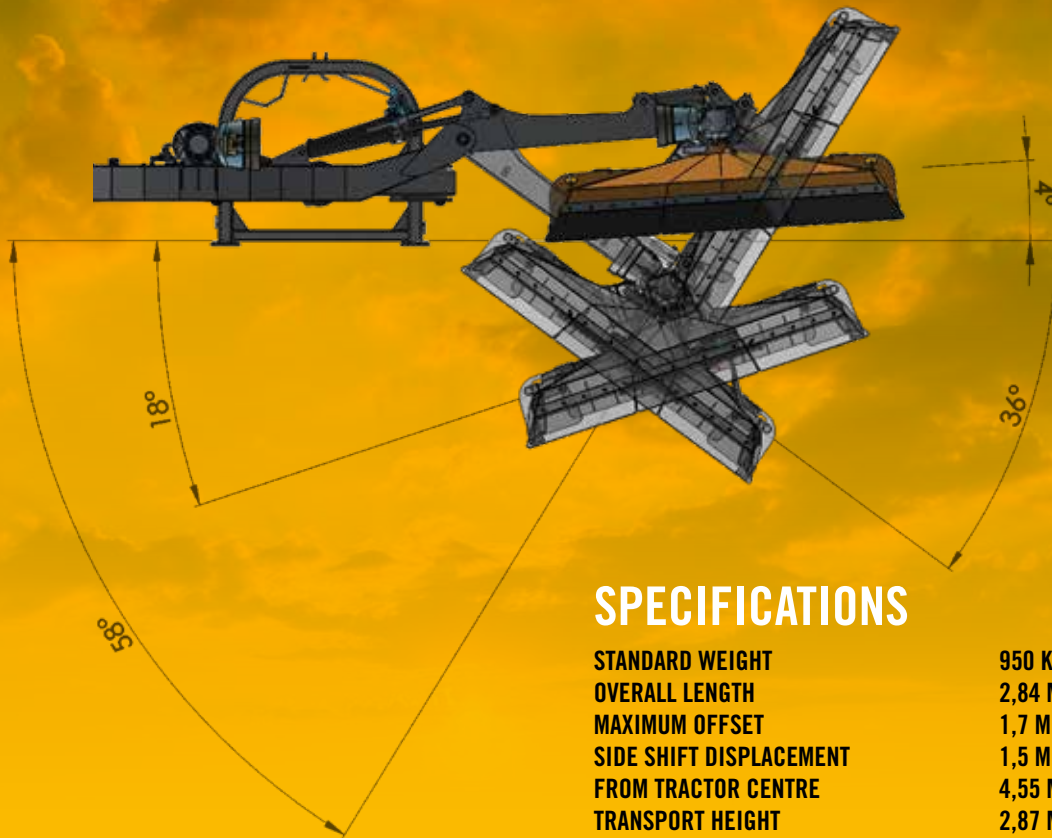

AN OPTIONAL HYDRAULIC LEVELING KIT IS AVAILABLE, WHICH ENABLES THE HEAD TO LINE-UP WITH THE TERRAIN, AND ENABLES THE MULCHER TO BE USED FOR BOTH SIDES OF THE DITCH, WITHOUT MAKING GROUND CONTACT.

THE NEW AND IMPROVED DESIGN, AND STREAMLINED SHAPE, HELPS TO IMPROVE MULCHING EFFICIENCY.

KRONOS

SPECIFICATIONS

STANDARD WEIGHT	950 KG
OVERALL LENGTH	2,84 M
MAXIMUM OFFSET	1,7 M
SIDE SHIFT DISPLACEMENT	1,5 M
FROM TRACTOR CENTRE	4,55 M
TRANSPORT HEIGHT	2,87 M
MAX. PTO SPEED	540 RPM
HYDRAULICS REQUIRED	2X DOUBLE-ACTING

OPTIONAL EQUIPMENT

- HYDRAULIC CYLINDER FOR FRONT HOOD
- KIT FOR REVERSE STATION OPERATION
- HYDRAULIC LEVELLING OF THE HEAD
