

## EXTENDO 610

### » EFFICIENT CHAIN MULCHER

Kronos **EXTENDO 610** boom mulcher comes with a reach of 6,1 meters. Extendo consists of the previously seen **PREDATOR 1700H** mulcher head, a boom with long reach and an integrated hydraulic circuit for the mulcher head. The boom can be operated with the tractor's own hydraulics or **LTCRANE**-control system that can be added as additional equipment. The parallel operation of the boom and cutting head makes the operation easy and stable.

### » FEATURES

- Integrated hydraulic circuit with oil tank and cooler. 70kw power (380bar).
- A reach of 6,1 meters from the center of the tractor.
- Parallel operation of boom and cutting head.
- Tilt on cutting head.
- Hydraulic operated front hood.
- Two-way collision protection, pressure accumulator on boom and spring mechanism on cutting head allowing the cutting head to move backwards and upwards in case of a collision.
- Replaceable skids made from Hardox steel.
- Tool box.
- Boom geometry designed to keep the cutting head forward for better ergonomics.
- Optimized shape of the cutting head.

### EXTENDO 610

Weight	2200 kg	<b>Required amount of double acting sections, with free return</b>	
Working width	1700 mm	Without LtCrane-steering system	4 pcs
PTO	750–850 rpm	With LtCrane	1 pcs
Outreach from the longitudinal axis of the tractor	6100 mm	With LtCrane, without Power Beyond	2 pcs
Recommended weight of tractor	6500 kg and more		

### OPTIONAL EQUIPMENT

- **4-section valve for boom movements.** Easily operated by right hand. Connected to the Power Beyond-outlet on the tractor. (Possible to connect to double acting outputs if desired.)
- **3-point lock system.** Makes the lift-arms on smaller tractors more stable which makes working more precise and helps to reduce the load on the lift arms. The 3-point lock can be retrofitted.
