

PREDATOR 2 1700 H

Working width	1700 mm
Oil required	100–150 l/min
Recommended Pressure	200–380 bar
Weight	420 kg
Length	2200 mm
Width	2000 mm
Height	808 mm
Wear surfaces	HARDOX
Installation	on cranes and excavators
Standard equipment	foldable front splash guard
Optional equipment	hydraulic front splash guard

» When cutting thick brush, the splash guard can be folded up and locked in the upper position. As an option, you can get a hydraulically operated hatch.

» TILT AND TURN UNIT

Weight	160 kg
Tilt angle	80 degrees
Turning angle	360 degrees

SMART SWITCH

- » Easy to replace the chain.
- » Inside the chain house there are six tracks to switch between, and you can use both 10 and 13 millimeter chains.

PREDATOR 2 1700 H

» CHAIN MULCHER

Kronos **PREDATOR 2 1700 H** is an effective chain mulcher even in tough conditions. We have invested in weight optimization, unique material choices and a greater working width. The result is a 1.7 meter wide cutting head which, despite its width, is considerably lighter than its predecessor. We use HARDOX wear steel on all exposed surfaces. The opening is rounded to get the best possible cutting effect, which also means less stress on the construction. Thanks to the new

construction on the chain house, it is easy to change the chain. Both 10 and 13 millimeter chains fit.

» FOR CRANES AND EXCAVATORS

The Predator 2 1700 H can also be mounted on an excavator or a forest crane. When clearing thick brushwood, the splash guard can be folded up and locked in the upper position. As an option, you can get a hydraulically operated hatch and the rake can also be equipped with a tilt and swivel unit.
